

We claim:

1. A fungicidal mixture comprising, as active components,

- (1) the triazolopyrimidine derivative of the formula I

and

- (2) dinocap of the formula II consisting of the dinitrophenol derivatives of the formulae IIa and IIb

where n is 0, 1 or 2,

in a synergistically effective amount.

2. A fungicidal mixture comprising the compound of the formula I and the mixed product II in a weight ratio of from 100:1 to 1:100.
3. A fungicidal composition comprising a liquid or solid carrier and a mixture as claimed in claim 1 or 2.
4. A method for controlling harmful fungi from the class of the *Oomycetes*, which comprises treating the fungi, their habitat or the seed, the soil or the plants to be protected against fungal attack with an effective amount of the compound I and dinocap II as set forth in claim 1.
5. A method according to claim 4, wherein the compounds I and IIa and IIb as set forth in claim 1 are applied simultaneously, that is jointly or separately, or in succession.

6. A method according to claim 4, wherein the mixture as claimed in claim 1 or 2 is applied to the soil or the plants to be protected against fungal attack in an amount of from 5 g/ha to 4000 g/ha.
- 5 7. A method according to claim 4 or 5, wherein the mixture as claimed in claim 1 or 2 is applied in an amount of from 1 to 1000 g/100 kg of seed.
- 10 8. A method according to any of claims 4 to 7, wherein the harmful fungus *Plasma-para viticola* is controlled.
9. Seed comprising the mixture as claimed in claim 1 or 2 in an amount of from 1 to 1000 g/100 kg.
- 15 10. The use of the compound I and the mixed product II as set forth in claim 1 for preparing a composition suitable for controlling *Oomycetes*.
